

Here is a project that was hard to wrap your head around (not to mention hard to wrap vinyl around) but with the co-operation of Ampco's Engineering, Installation and the Digital and Duratext departments we got it wrapped.

Cool stuff by Ampco

Look out meter maids... Digital Pioneer recently introduced a Parking Meter that takes a photo of your vehicle licence plate when the meter runs out. Ampco supplied the faceplates for this revolutionary product. Still in the testing phase, you'll find them in various locations throughout the Lower Mainland.

Canadian Intermodal services is making a big statement with these new containers – the first ten of twenty are now complete and waiting to ship overseas.

Ampco's products made a big splash with our customers and attendees at Mid America 2006 in Louisville, Kentucky.

Mid America is the world's largest truck show and our products were displayed prominently with Mack, Volvo, Peterbilt and Kenworth.

Another great month! Congratulations to everyone at Ampco!
