Ampco

Q2 2008

**Prototype Development:**

Elastomer keypad for a control equipment for mirrors, mirror heat and lock/unlock. Ampco Engineering Team has developed the 3D model (right) based on the concept sketch (left). Ampco Electronics Team is also involved in the development of custom door modules. The manufacturing & assembly effort will be shared by Ampco and MTM.

**Work in Development:  
7 keys Membrane Switch**

ITT designs water pump controllers for water and wastewater systems for industrial, commercial and residential use. The development project needs to have a rugged and functional, yet professional looking membrane switch panel that Ampco supplies.
